Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including the step of operating the engine such that engine output power is generally constant when an output power of the energy storage device is within a first predetermined range; and adjusting the at least one engine parameter, thereby changing the engine output power, when the output power of the energy storage device is outside the first predetermined range, the at least one engine parameter being adjusted to facilitate a change in the output power of the energy storage device from outside the first predetermined range into the first predetermined range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
